

## ERRATUM

### **Getting Counted: Markets, Media, and Reality**

Mark Thomas Kennedy  
*University of Southern California*

In: AMERICAN SOCIOLOGICAL REVIEW, 2008, Vol. 73 (April:270–295)

On p. 281, the two sentences that begin “As a robustness check” should read:

As a robustness check, model correlations were tested using seemingly unrelated regression. Residuals of the coverage and coverage centrality models are correlated at .18 ( $p < .01$ ), but the Breusch-Pagan test did not show correlations between the models of exit and either coverage ( $\text{Chi}^2 = 2.89$ , d.f. = 1,  $p = .09$ ) or coverage centrality ( $\text{Chi}^2 = .39$ , d.f. = 1,  $p = .53$ ).
