

**APPLICATION FOR
INTEGRATING CENSUS DATA ANALYSIS INTO THE CURRICULUM**

Department name _____

Mailing address _____

Department coordinator for the IDA project [name, phone, e-mail]

Department chair [name, phone, e-mail]

Number of full-time sociology faculty in the department _____

Number of graduating majors in AY 2000-01 _____

Number of declared majors in fall 2001 _____

Number of declared minors in fall 2001 _____

Describe the degrees, tracks, concentrations offered by your department:

Names of faculty who will be a part of the project (each faculty member should complete the Participating Faculty Form). The total number of faculty involved should be half of the full-time faculty (at least seven faculty for a department of 15 or larger).

Indicate (in no more than ten pages) how the participation of your department would be timely and appropriate given your department's current offerings and future plans.

- Indicate your goals for integrating scientific literacy into the curriculum; how do these plans improve on the status quo, tap department strengths, fit with institutional mission, and addresses perceived weaknesses?
- Describe your current curriculum, and data analysis and research training opportunities
- Outline how your participation and implementation of IDA would enhance the research training for majors and non-majors
- Address issues of sustainability of this IDA project and dissemination to and collaboration with other (social science) departments at your institution
- Append the list of courses regularly taught in the department, highlighting those that have strong research components

Send this application and the forms from the individual faculty to ASA no later than December 1, 2001.

PARTICIPATING FACULTY FORM

Faculty name _____

Department name _____

Faculty Mailing address _____

Faculty e-mail and phone # _____

Undergraduate courses I routinely teach

Course #	Course Title	Average enrollment
----------	--------------	--------------------

Please asterisk the 2-3 courses for which you are most likely to develop and use IDA modules.

I am pleased to be a part of the Department's application as an Integrating Data Analysis (IDA) faculty member. I understand that, if selected, all IDA faculty would be expected to:

- Engage in preparatory work prior to the June 2002 workshop
- Attend and fully participate in the June 2002 workshop in Ann Arbor, MI
- Implement at least one IDA module in academic year 2002-2003
- Participate in the site visit and continue to engage in research training activities in academic years 2002-2004
- Attend IDA meetings at the 2002 and 2003 ASA Annual Meetings
- Provide feedback and evaluation on the undergraduate research training project
